

Are you planning to build a building?

- Crossbridge owns approximately 30 acres at Hursh Rd and I-69 for the development of a permanent campus.

- Starting in the Fall of '08 we began construction on The Hub, a 6,800 sq. ft. ministry facility and office space that allows us to do ministry 6½ other days of the week, as we will continue meeting on Sunday mornings at the Parkview YMCA off of Dupont Rd. We moved into The Hub in April '09 and continue to use it, as well as the property surrounding it, for everything from Kids Sports Ministry to small group meetings to staff offices. We have always believed that "the church" is not a building, but a community of people. The Hub, as well as our future permanent campus, are not the vision of Crossbridge. They're simply tools and resources that will help us pursue our mission of transforming lives by helping people take next steps with God

- As God blesses our congregation with growth and finances (in His timing), the Board and our Building Team are responsible for coordinating the design and construction of our new facilities on this campus. There is no established timetable for future building, just a desire for us to use the resources God brings us to most effectively chase our mission.
